

Europlacer Group Quality Policy Statement

EUROPLACER Group is committed to providing products and services which meet our customers specified and anticipated needs in an organised and professional manner.

We will do this by means of a Total Quality Assured service in which quality is the responsibility of all our employees and in which we comply with all relevant statutory requirements.

The Group's development is based on our core values of Innovation, Excellence and Integrity and we are committed to continually improving the effectiveness of our Quality Management System, products and services. This will be pursued through ongoing investment in technology and in our employees.

Continuous improvement throughout the business is a key focus and our improvement activities will be measured against Quality Objectives consistent with this policy. It is our goal to ensure that these Objectives are clearly communicated to all personnel, consistently monitored and reviewed regularly at management level.

We will further ensure that this Quality Policy Statement is communicated and understood throughout the Organisation; it will be reviewed as an integral part of the Group Quality System to evaluate its continued suitability to the Organisation.

Group Operation Officer	Groupe Quality Manager
M. Huet	M. Harris
